PROFILE

Detail-oriented Information Technology Undergraduate (Year 2, Semester 2) at Sri Lanka Institute of Information Technology. Passionate about full-stack web and application development, with a strong foundation in Object-Oriented Programming (Java) and Web Technologies. Proven ability to translate complex requirements into functional code through academic projects. Currently seeking a challenging internship to contribute to a professional development team while further honing industry-standard technical skills.

TECHNICAL SKILLS

- **Languages:** Java (Advanced), JavaScript (ES6), SQL
 - **Web Development:** HTML5, CSS3, Basics of React.js & Node.js
 - **Database:** MySQL, MongoDB
 - **Tools & Platforms:** Git, GitHub, VS Code, IntelliJ IDEA
 - **Core Concepts:** OOP, Data Structure & Algorithms (DSA), REST APIs, SDLC
-

EDUCATION

BSc (Hons) in Information Technology | 2024 – Present | Sri Lanka Institute of Information Technology (SLIIT)

Diploma in English and Information Technology | 2024 Jan – 2025 Jan | ESoft Metro Campus

G.C.E. Advanced Level Examination | 2023/2024 | Saranath National College, Kuliyaipitiya

Physical Science Stream

- Combined Mathematics: S
 - Chemistry: S
 - Physics: S
-

PROJECTS

Customer Support System | Group Project | Full-Stack Web Application | Java, Spring Boot, MySQL, HTML, CSS

- Developed a web-based customer care support system using **Java, Spring Boot, MySQL, HTML, and CSS**. The system allows users to submit and track support tickets, communicate with support agents via live chat, and provide feedback after issue resolution. Implemented **role-based access control** (Admin, Support Agent, User), user registration & authentication, ticket search and filtering, escalation mechanism, automated notifications, and an admin dashboard for system monitoring and management.

Uni Navigator | Group project | Full-Stack Web Application | Java script, MySQL, HTML, CSS

- UNI Navigator is an academic management web application developed using **JavaScript, HTML, CSS, Node.js, and MySQL** to help university students manage their academic activities efficiently. The system includes features such as GPA and CGPA calculation, target GPA prediction, attendance tracking with geofencing, repeat module management, task and deadline management. Special things are dashboard notifications, and academic report generation. The platform was designed to simplify academic planning, improve productivity, and reduce the difficulties of manual academic tracking through a modern and user-friendly interface.

Library Management System | Individual project | Full-Stack Web Application | MERN

- Library Management System is a full-stack web application developed using the MERN Stack (MongoDB, Express.js, React.js, and Node.js) to manage and automate library operations efficiently. The system includes features such as book management, member registration, book issuing and returning, search and filtering functions, and due date tracking. Special features include real-time data updates, user authentication, and an organized dashboard for managing library records. The platform was designed to reduce manual work, improve data accuracy, and provide a modern and user-friendly experience for both administrators and users.

SOFT SKILLS

- Problem-Solving | Analytical Mindset
 - Team Collaboration | Agile Methodology
 - Quick Learner | Technical Adaptability
 - Time Management | Project Planning
 - Effective Communication
-
